

CESM Ocean Model Working Group Session
Tuesday, 19 June 2012
The Village – Elk Room – Breckenridge, Colorado

- 8:30 a.m. [Todd Ringler](#) – Status of MPAS-O
- 8:50 a.m. [Mathew Maltrud](#) – Implementation of the Robert filter in POP2
- 9:05 a.m. [Matthew Hecht](#) – Status of vertical coordinate changes and ice-shelf implementations in POP2
- 9:15 a.m. [Susan Bates](#) – Summary of other ongoing developments in POP2 and planned experiments on Yellowstone
- 9:30 a.m. [Dave Brown](#) – Ocean diagnostics package with NCL
- 9:45 a.m. [Matthew Long](#) – Ocean physics and BGC
- 10:00 a.m. [Yu-Heng Tseng](#) – Estuary-shelf freshwater exchange parameterizations in CESM
- 11:00 a.m. [James Gattiker](#) – Uncertainty quantification in POP2 and MPAS ocean models
- 11:15 a.m. [Giuseppe Fogli](#) – Preliminary results of the CESM – NEMO coupling
- 11:30 a.m. [Stephen Griffies](#) – Sea level in ocean climate models
