

# CESM Land Ice: Useful links

## Land Ice Working Group info

- Web site: [http://www.cesm.ucar.edu/working\\_groups/Land+Ice/](http://www.cesm.ucar.edu/working_groups/Land+Ice/)
- Email list: <http://mailman.cgd.ucar.edu/mailman/listinfo/ccsm-liwg>

## Community Ice Sheet Model (CISM) development

- New subversion repository: <https://svn-cism-model.cgd.ucar.edu/>
- Repo access form:  
[http://www.cesm.ucar.edu/working\\_groups/Software/secp/repo\\_access\\_form.shtml](http://www.cesm.ucar.edu/working_groups/Software/secp/repo_access_form.shtml)

## Model documentation

- <http://www.cesm.ucar.edu/models/cesm1.0/cism/>

## CISM tutorials

- <http://oceans11.lanl.gov/twiki/bin/view/Cosim/MaterialCISM>

These are for the LANL machine *mapache*, but most of the material applies to *bluefire* and other machines.

## Useful compsets

**IG** Active land and ice sheet, data atmosphere

**FG** Active atmosphere, land, and ice sheet

**BG** Fully coupled, including active ice sheet

**TG** Active ice sheet, data land (surface mass balance)

Most of these come in several flavors (e.g, IG1850, IG2000).
