You successfully ran a case called case001 for 10 years (in a single submission). You want to extent your run for another 10 years. How can you do this ?

What variable(s) do you need to change (specify the values) ?

Set the variable `CONTINUE_RUN= TRUE`

Resubmit the run: `./case001.submit`

Because you got 10 years in 1 submission, you have

`STOP_OPTION = nyears`

`STOP_N = 10`

`RESUBMIT = 0`

Common mistake:

`RESUBMIT =1 => your run will resubmit twice`

There is no need to rebuild, `cesm_set_up`.

This is not a branch run
