

Ice sheet model development for CESM1.1.0 and beyond

Bill Sacks

LIWG Software Engineering Liaison
Climate & Global Dynamics Division
NCAR

CISM in CESM

CESM 1.1 Release

Target release date: Nov 1

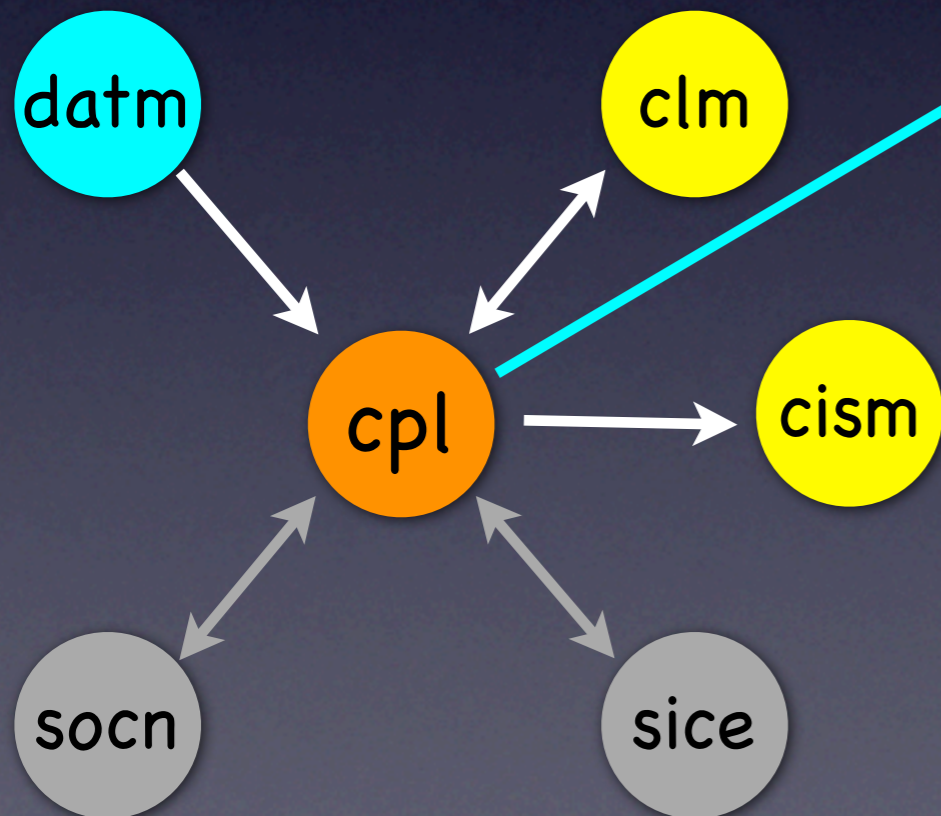

- Ensemble capabilities
- New grid support
 - ▶ e.g., CAM-SE (HOMME grid): unstructured grid
 - ▶ Better support for user-created grids
- High-resolution land datasets
- Standardized namelist generation

New TG Compset

Key: **active** / **data** / stub model

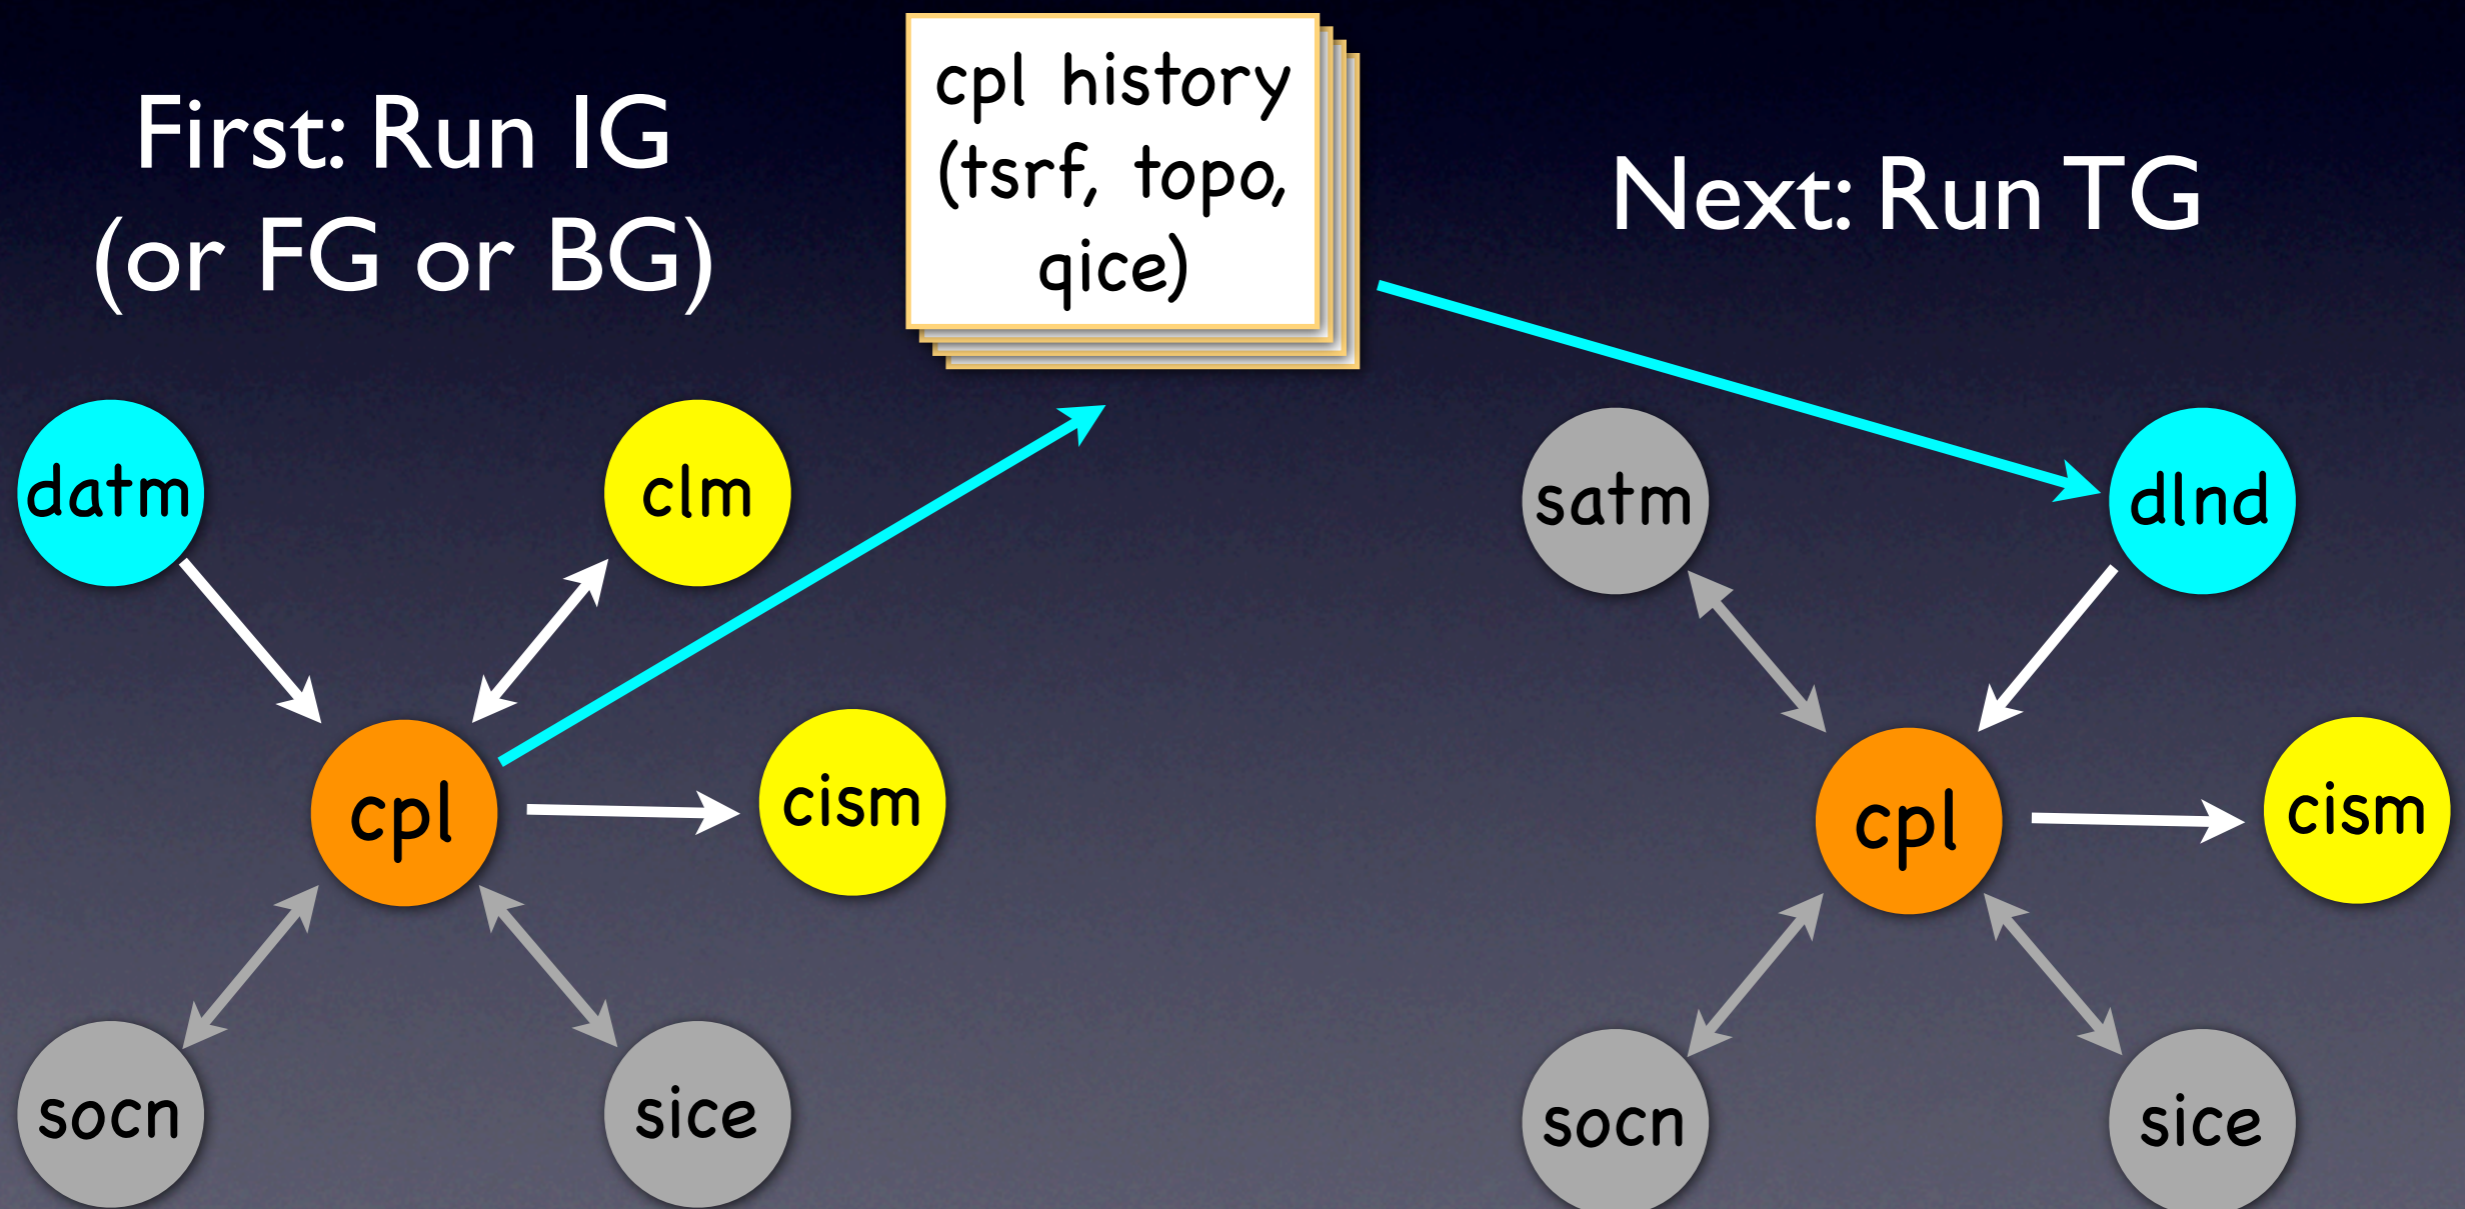

First: Run IG
(or FG or BG)

cpl history
(tsrf, topo,
qice)

New TG Compset

Key: **active** / **data** / stub model

New CISM Features

- CISM2!
 - ▶ SEACISM dynamical core, parallel solvers, etc.
 - ▶ BICICLES coming soon
- Support for longer time steps in CISM and CESM scripts
 - ▶ e.g., 1-year time step
- New default Greenland grid: 5 km

New CISM Features

- CISM2!
 - ▶ SEACISM dynamical core, parallel solvers, etc.
 - ▶ BICICLES coming soon
- Support for longer time steps in CISM and CESM scripts
 - ▶ e.g., 1-year time step
- New default Greenland grid: 5 km

Greenland ice surface upper elevation (m)

Bamber et al. (2001); data set created by Jesse Johnson, Brian Hand, Tim Bocek - University of Montana

New namelist features

Namelist modifications go in `$CASEROOT/user_nl_cism`

For example:

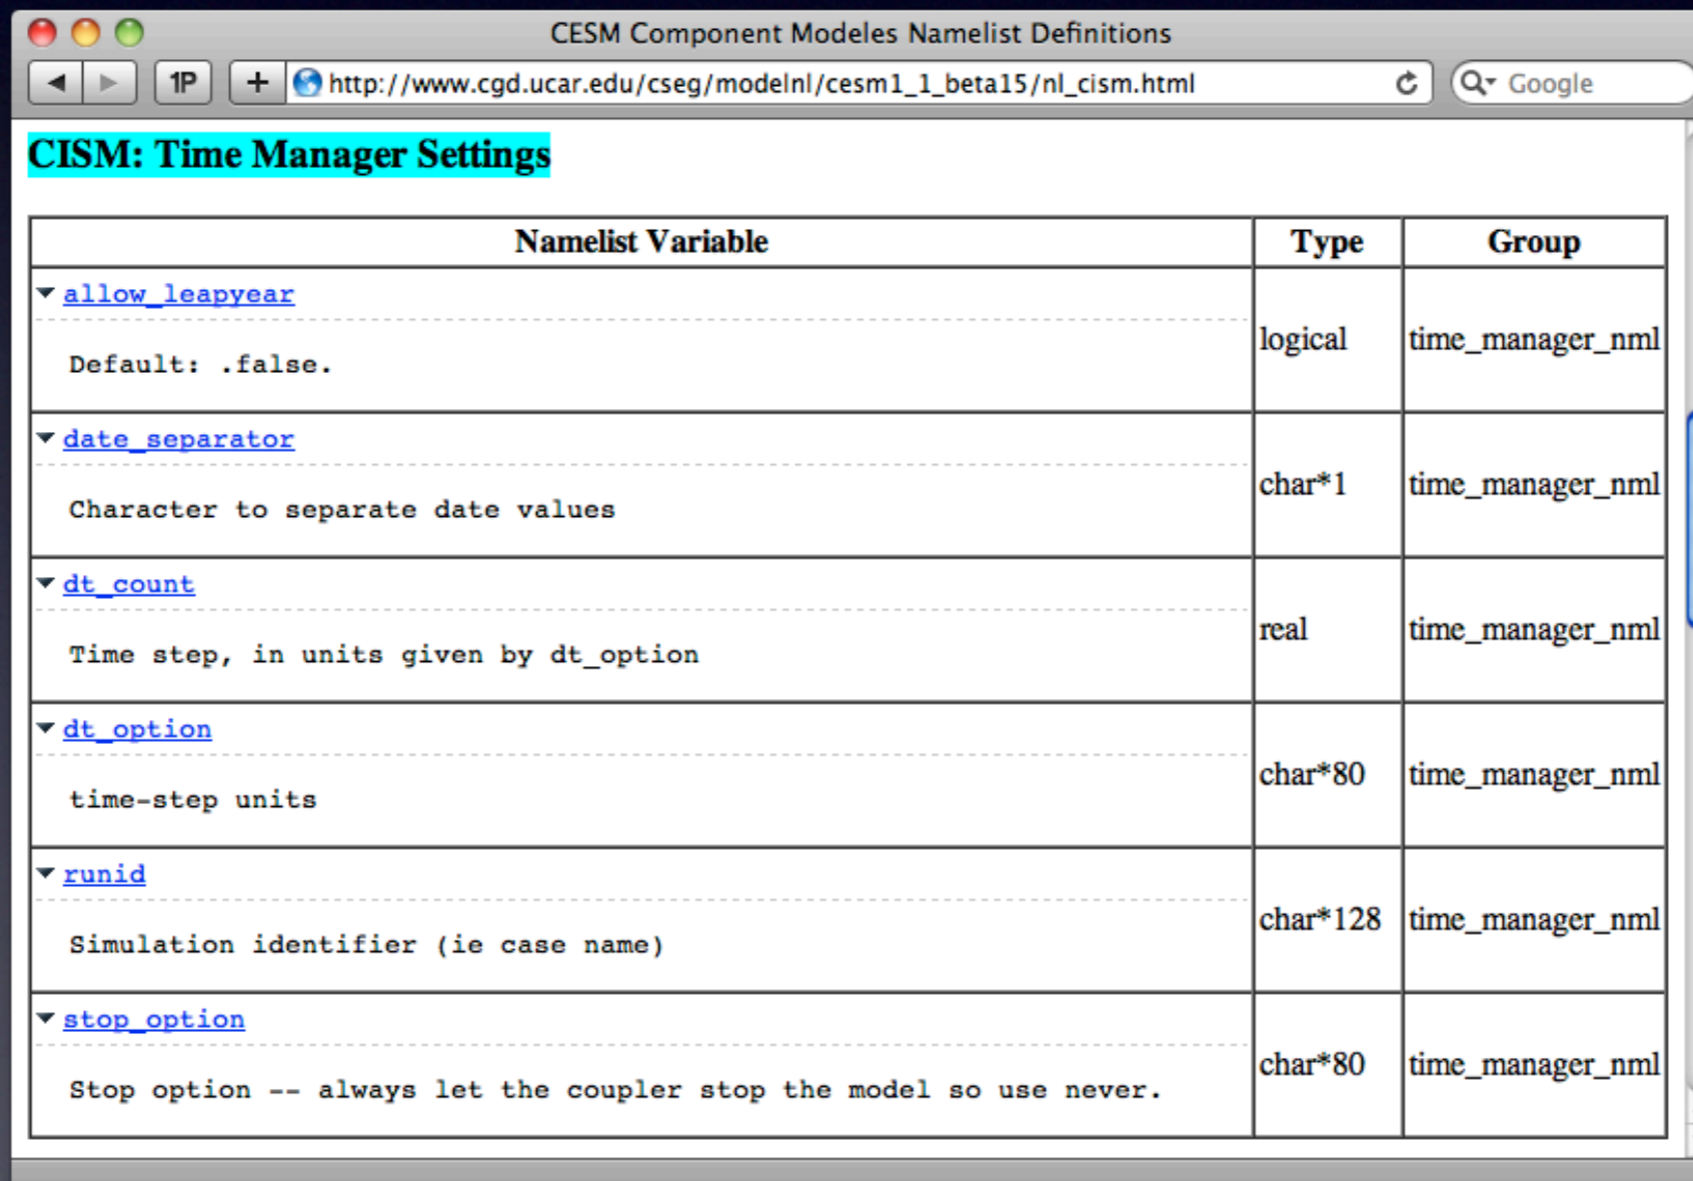

```
evolution = 0
```

New namelist features

Namelist modifications go in `$CASEROOT/user_nl_cism`

For example:

```
evolution = 0
```

CESM Component Models Namelist Definitions

http://www.cgd.ucar.edu/cseg/models/cesm1_1_beta15/nl_cism.html

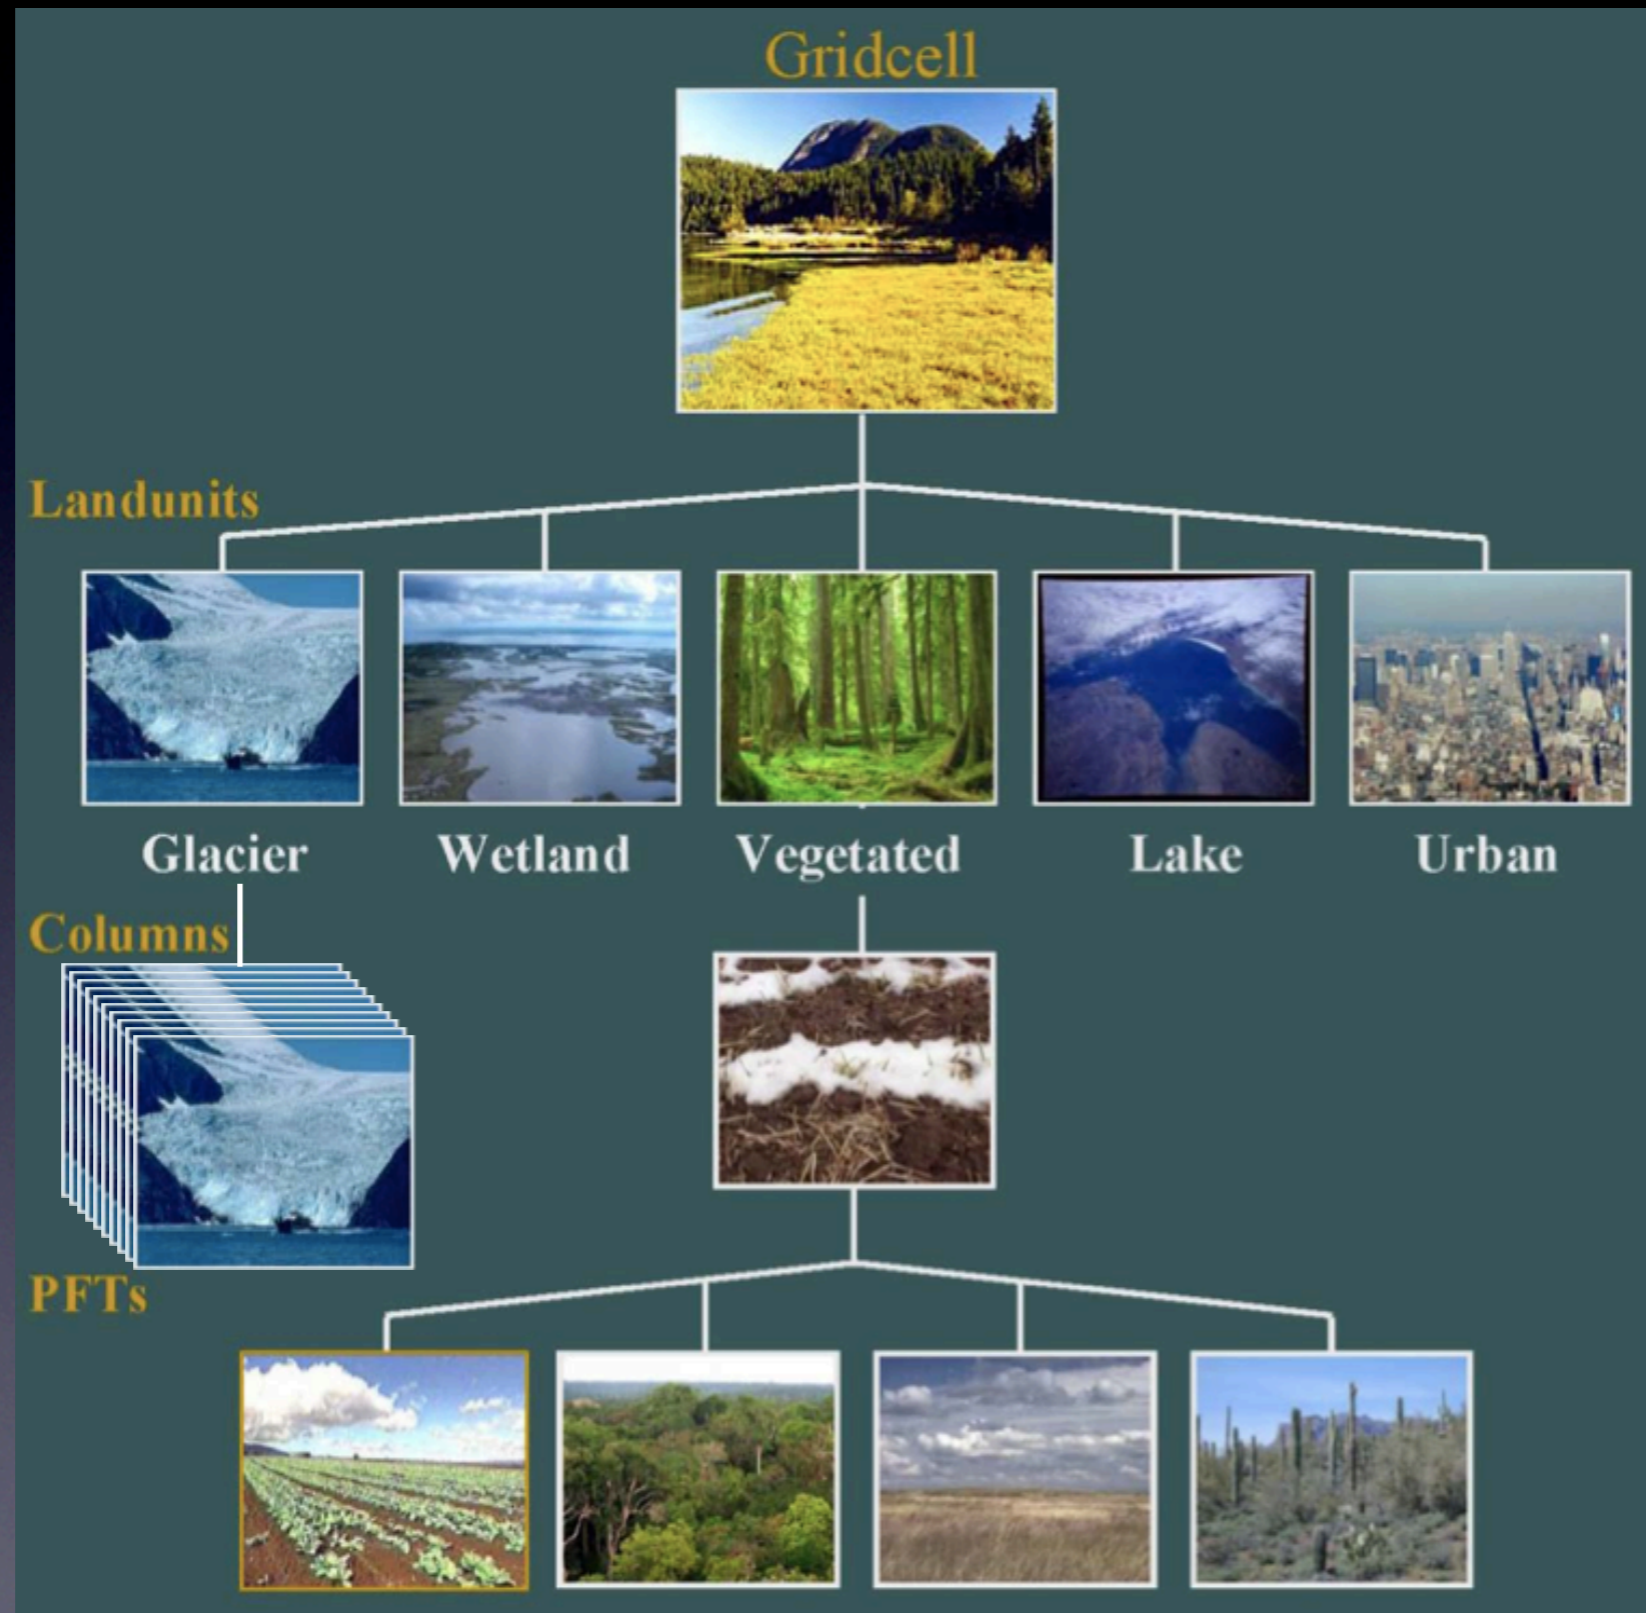

CISM: Time Manager Settings

Namelist Variable	Type	Group
allow_leapyear Default: <code>.false.</code>	logical	time_manager_nml
date_separator Character to separate date values	char*1	time_manager_nml
dt_count Time step, in units given by <code>dt_option</code>	real	time_manager_nml
dt_option time-step units	char*80	time_manager_nml
runid Simulation identifier (ie case name)	char*128	time_manager_nml
stop_option Stop option -- always let the coupler stop the model so use never.	char*80	time_manager_nml

New CLM Features

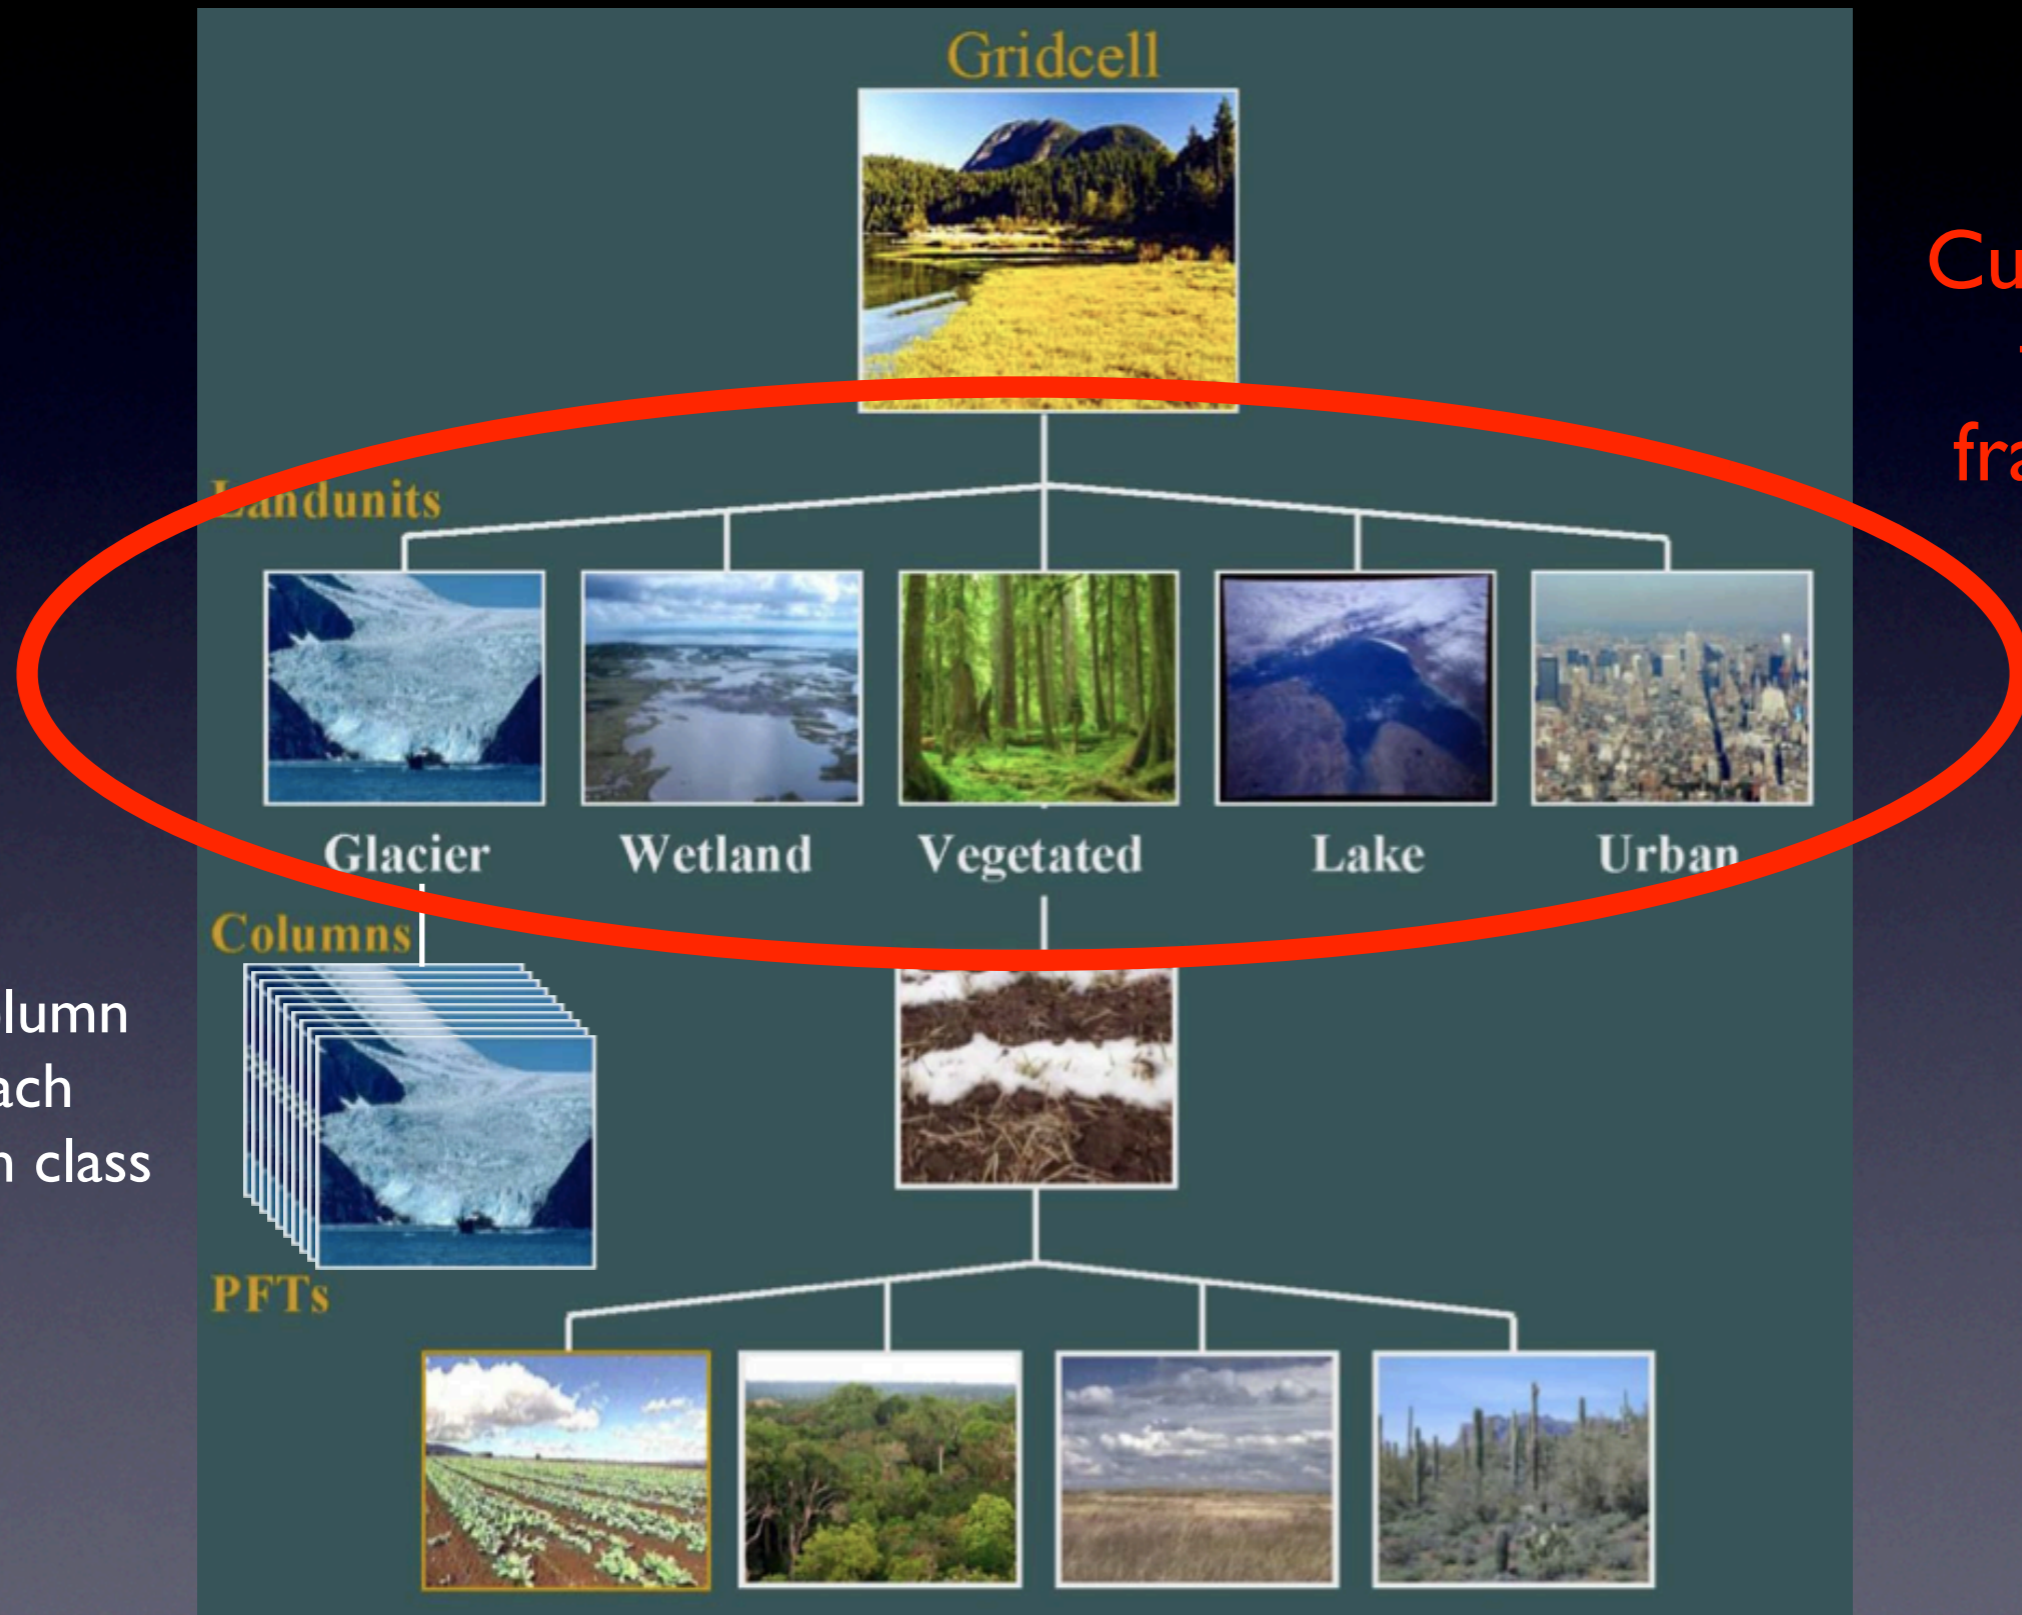

- Improved glacier cover, consistent with CISM over Greenland
 - ▶ Global glacier mask from Alex Gardner
- Ability to output fields averaged only over glacier portion of each grid cell
- Glacier-related bug fixes

Dynamic Landunits in CLM

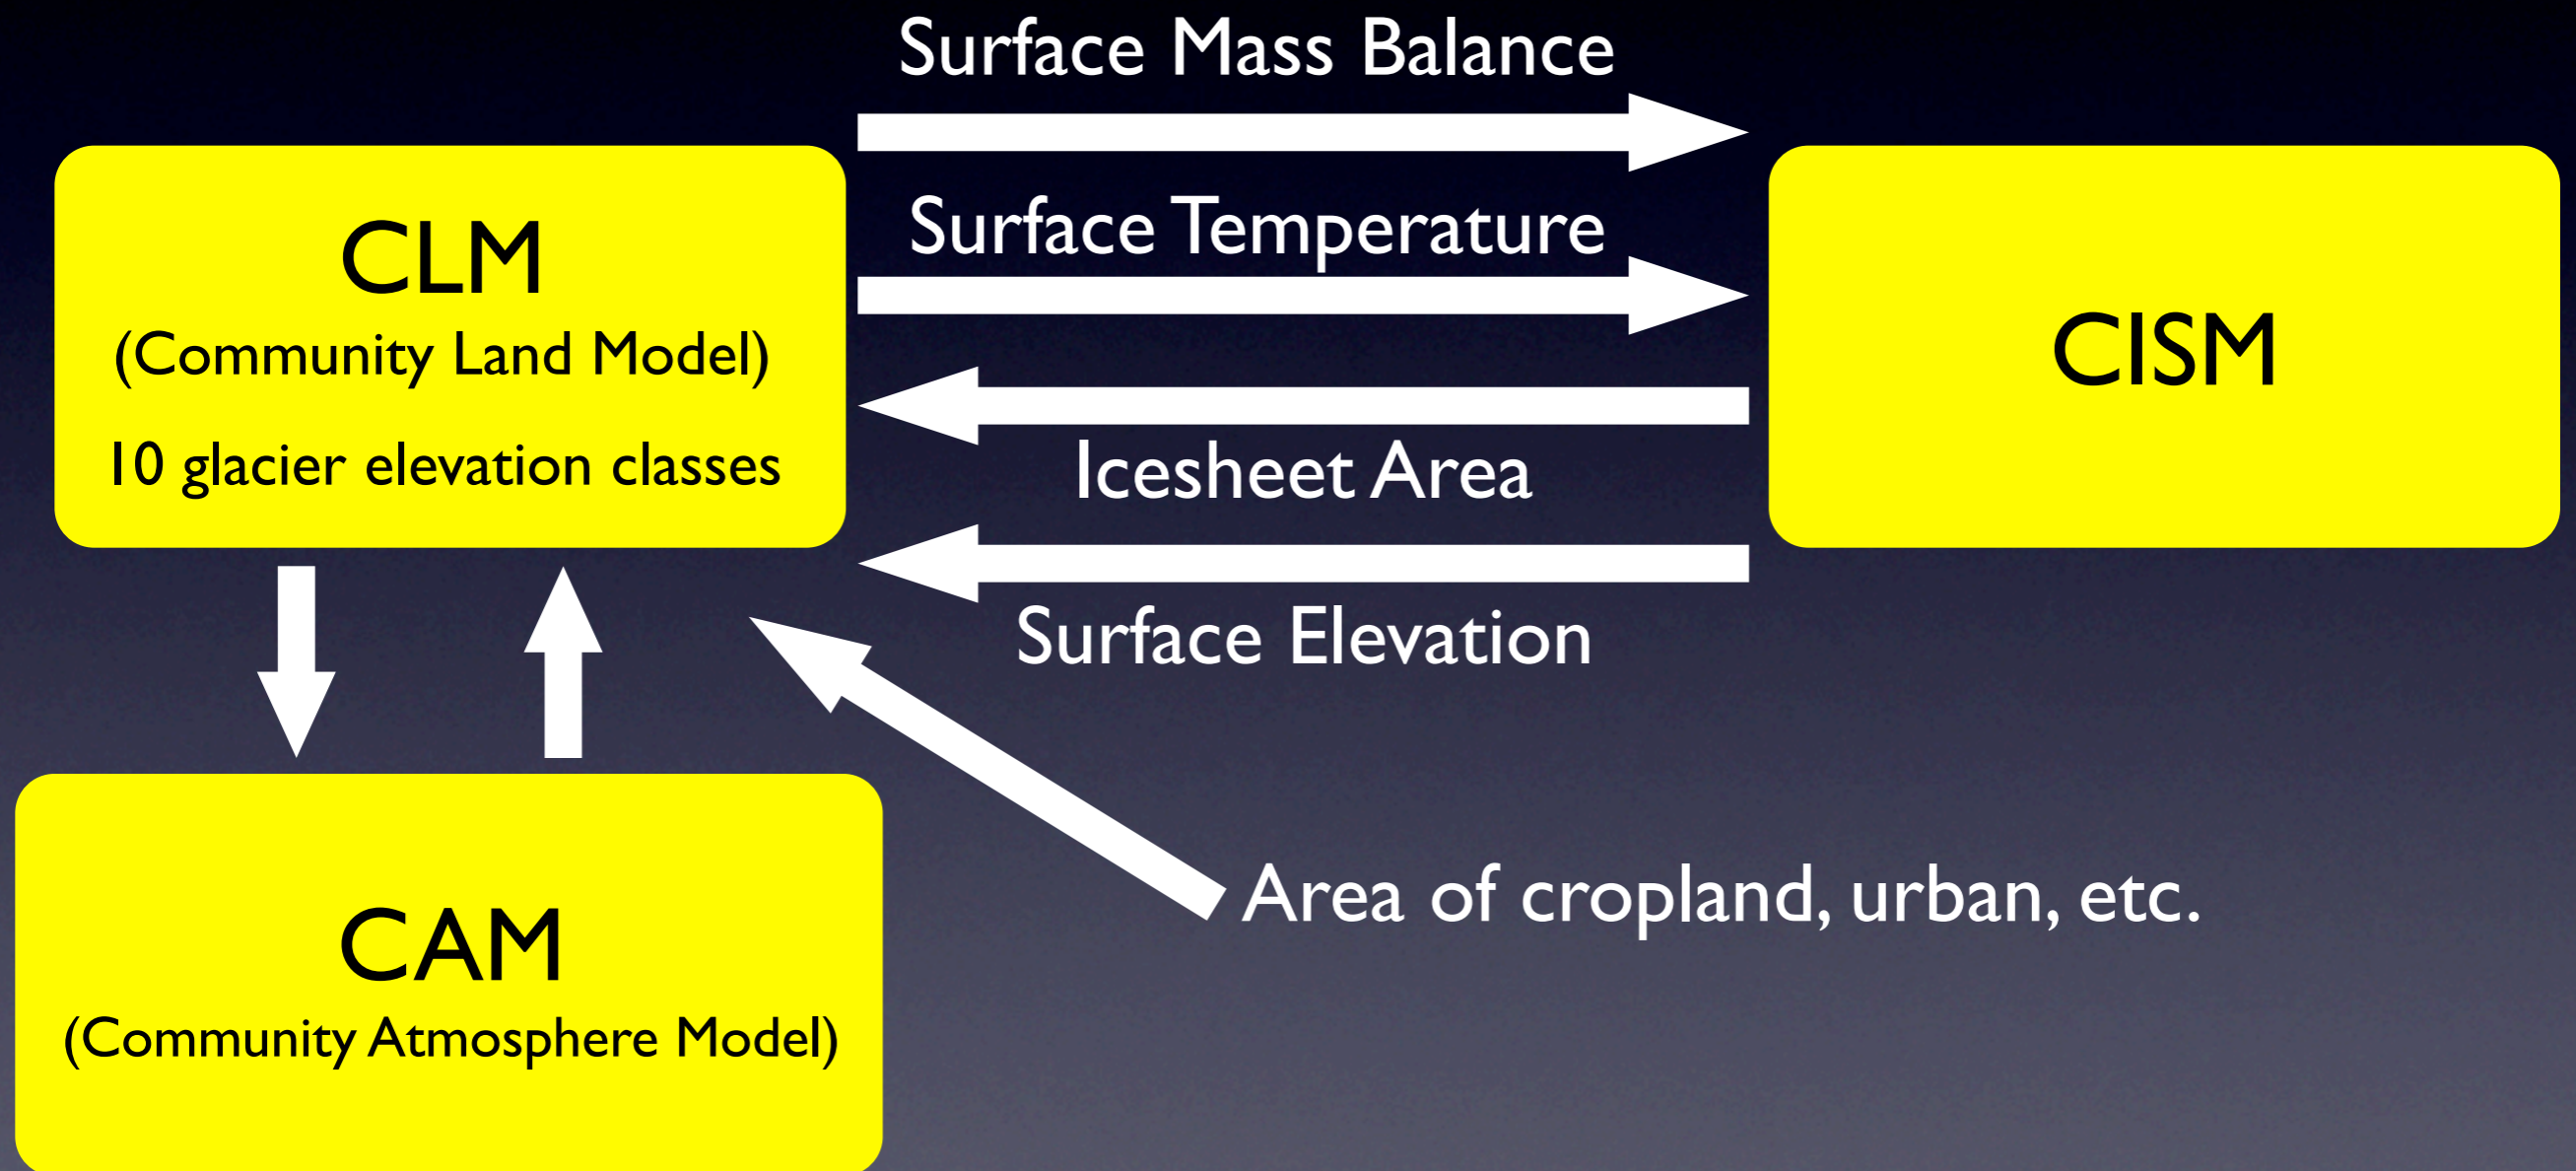

One column
for each
elevation class

Dynamic Landunits in CLM

Currently:
fixed
fractions

Dynamic Landunits in CLM

Summary: Major changes

- TG compset
- CISM2
- Improved namelist functionality
- Improved glacier cover in CLM
- Dynamic landunits in CLM (in progress)
