

CESM Breckenridge 2013

“A charge to working groups”

CESM2 (released 2016 for CMIP6)

1) What are the new science opportunities?

- small scale phenomena
- biogeochemical cycles
- sea level rise
- climate/human system interactions
- near-term climate projections
- (your idea here)

2) What are the biases that limit us from going after these opportunities?
